

Community Liaison Group

Thursday 10 June

Agenda

1. Introductions
2. Safety moment
3. Actions from previous meeting
4. Community feedback from CLG members
5. Project updates
6. Community engagement update
7. NLWA update
8. Questions

1. Introductions

2. Safety moment

Douglas Chisholm

Working at Height

- The construction of the Resource Recovery Facility will soon involve works to erect the building frame which makes 'working at height' a focus of attention on site.
- Our involvement of the constructor, Taylor Woodrow, in the design of the steel frame building means that we have enabled them to reduce the amount of work needed to be carried out at height.

3. Actions from previous CLG meeting

Christian Cosby

Actions from previous CLG meeting

Action	Responsibility	Completion Date	Current Status
Prioritise local residents for future apprenticeship recruitment campaigns	NLWA	Next recruitment campaign, date TBC	<p>Our recruitment campaigns are aimed at residents in north London, with a particular interest for Enfield, Haringey and Waltham Forest.</p> <p>We are liaising with the employment teams at Enfield, Haringey and Waltham Forest councils to ensure apprenticeships are being advertised locally and to underrepresented groups. In the coming months we will be sharing opportunities with our database which includes Enfield, Haringey and Waltham Forest residents.</p>
Advertise the apprenticeship recruitment in Edmonton	NLWA	Next recruitment campaign, date TBC	We will advertise opportunities in local newspapers, <i>Enfield Independent</i> and <i>Enfield Dispatch</i> , as well as emailing opportunities to Enfield residents who are registered on our database and on social media.

4. Community feedback from CLG members

CLG members

Community feedback from CLG members

- Do you have any feedback or updates to share with the CLG?

5. Project updates

Ursula Taylor

NLHPP Overview

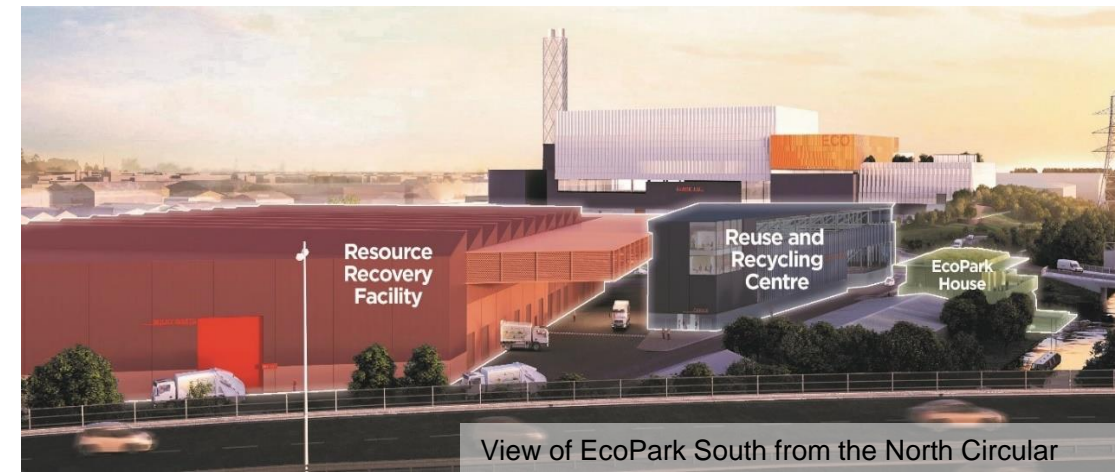

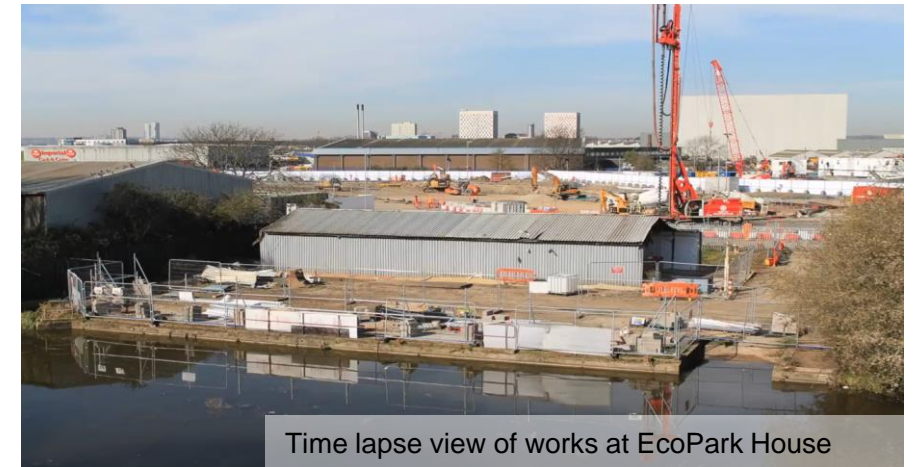

EcoPark South

Works to deliver the new Resource Recovery Facility (RRF), public Reuse and Recycling Centre (RRC) and EcoPark House are progressing well.

- Piling works have begun to prepare the ground for the steelwork construction which will form the new facilities. Taylor Woodrow is using an innovative piling technique which is helping to **reduce embodied carbon by 10-16%**.
- This month, the first piece of steelwork will be erected and the above ground structure of the RRF will begin to take shape.
- Later this year, we will begin cladding and installing the roof and the internal fit out of the new facilities will be underway.

Sewer Diversion

- We have carried out complex engineering works to be carried out to divert the Angel and Chingford sewers running beneath the footprint of the future Resource Recovery Facility.
- Two 15-tonne Tunnel Boring Machines were used to carry out the works.
- An innovative tunnel drive shaft design was used to carry out the tunnel boring using two pipe jacks from a single shaft at the same time. This enabled them to recycle water through both machines and **reduce the amount of water required by 65%**.

Tunnel Boring Machines used at the Sewer Diversion site

Tunnel boring works as part of the Sewer Diversion

We continue to prioritise the safety of our workforce and have introduced new measures to ensure the safety of those working on site during the pandemic:

COVID-19 Taskforce:

- Introduced a COVID-19 Taskforce to plan how the NLHPP will respond to the challenges from the COVID-19 pandemic

beable health check and tracking app

- Adopted a six-month contract for the Beable health check and tracking app. The safety bracelets track interactions between site workers to help construction sites work safely during COVID-19.

Beable safety bracelet

Antigen testing

- Since January 2021, we have been carrying out rapid antigen testing on site. To date, **1754 tests** have been carried out on the NLHPP workforce

Occupational health checks

- Contractor Taylor Woodrow have provided occupational health checks for their on-site staff.

On-site antigen test

Apprenticeship update

- **16 apprenticeships** created so far in roles across **civil engineering, quantity surveying** and **business administration**. 10 of these have been fulfilled by Enfield residents.
- During construction, the NLHPP will create at least **100 apprenticeship opportunities** for the local community.
- We are liaising closely with **Haringey Works and Build Enfield and Waltham Forest** to share apprentice opportunities and reach underrepresented and disadvantaged groups.
- We're also engaging with **Women in Construction, YMCA** and **Build a Fairer Chance**.

Joe Wheeler, aged 19 from Enfield is undertaking a two-year Civil Engineering apprenticeship on the NLHPP with contractor Taylor Woodrow.

Joe said "I am very lucky to have joined the apprenticeship scheme with Taylor Woodrow and am enjoying everyday at work with support from my team mates".

"I have started to use AutoCAD software and am undertaking surveys to identify existing services at the EcoPark prior to advanced works starting".

Joe Wheeler

#BuildingBenefits

We asked our apprentices...

Why did you apply for an apprenticeship?

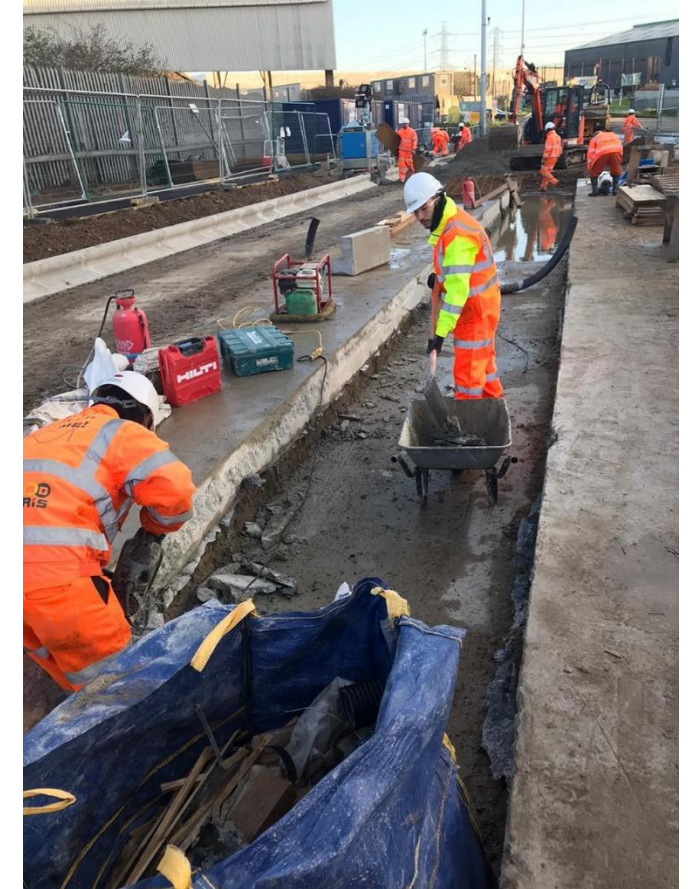

We asked our apprentices...

What do you want to get out of your apprenticeship?

On-site training update

- **40 on-site training opportunities** created so far. 83% of these have been fulfilled by residents of Enfield, Waltham Forest or Haringey.
- During construction, the NLHPP will create at least **225 on-site training opportunities** providing residents with an opportunity to work towards obtaining a Construction Skills Certification Scheme (CSCS) card.
- We're currently welcoming new cohorts of trainees onto the NLHPP working with Taylor Woodrow. Residents can register their interest about the training placements by emailing info@northlondonheatandpower.london

We're focussed on creating opportunities for local businesses. We are already working with:

- Enfield-based subcontractors **Embassy Demolition** and **J O'Doherty Haulage and Waste Disposal**, who have carried out demolition works across a number of projects.
- Walthamstow-based **New Life Catering**, who are providing canteen catering on the Laydown area.

Local business spotlight:

- *Enfield-based IT consultant, James Clear-Tournas, recently carried out broadband connection works at the new Laydown Area office and welfare facilities.*
- *His technical expertise helped the Project identify a cost-saving solution which provided a service upgrade for LondonEnergy Ltd, as well as a fast and reliable connection to the Laydown Area offices.*

Enfield based IT consultant, James Clear-Tournas

We are committed to delivering local benefits on the NLHPP.

- We're providing **apprenticeship** and **training** opportunities.
- Where possible, we're creating opportunities for **local businesses** by using **north London suppliers**.
- We are delivering a **schools' outreach programme**.
- All our contractors pay the **London Living Wage**.

Building Benefits

During training placements, local residents will obtain skills for future employment including...

Classroom learning

On-site experience

Building Benefits

All of our workers are paid the **London Living Wage**

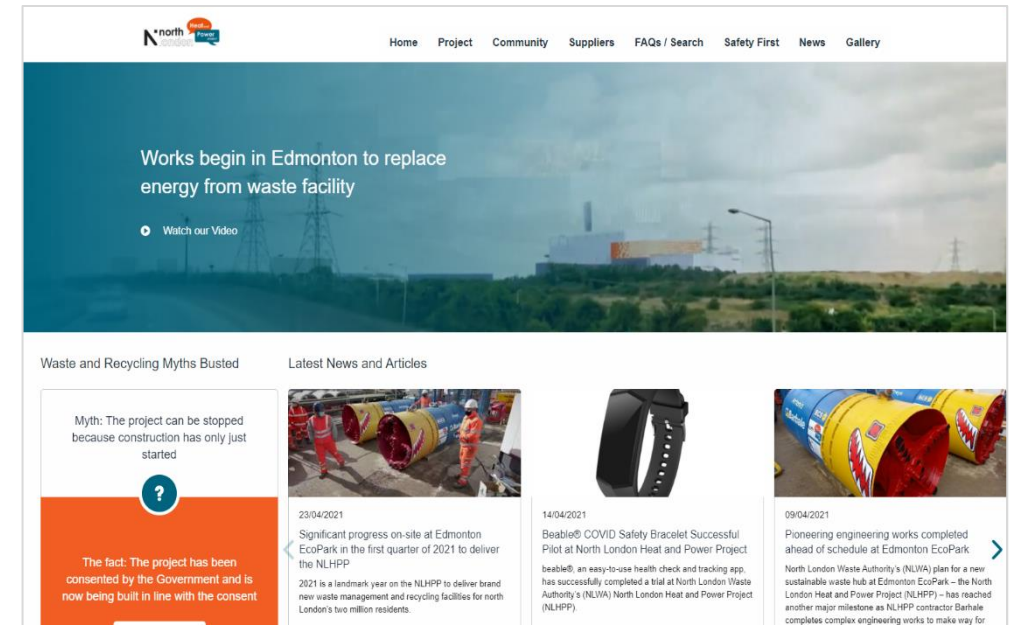

6. Community engagement update

Trudi Axtens

Throughout the pandemic we have increased our digital engagement to maintain communication with the local community whilst we haven't been able to hold physical events.

- Our fourth construction update video was produced in April. Our next video will be launched in June.
- Regular NLHPP website updates with FAQs, project news and announcements.

We continue to update our social media channels with latest project news.

- Our **#BuildingBenefits** campaign raises awareness about the apprentice and training opportunities for local residents.
- We are monitoring construction progress through **time-lapse videos** which are shared on social media and the NLHPP website.

Updating the community

- **Construction newsletter** delivered to 19,000 homes in May.
- Updating on project progress and delivery, information on apprenticeships and on-site training and how to apply, and a local business update.

7. NLWA update

Martin Capstick

- Waste Prevention Community Fund winning initiatives – successful applicants for 2021 have been shortlisted and will be announced in June.
- London Climate Action Week (26 June – 4 July).
- Contamination campaign to raise awareness around the problem of contamination (28 June – 19 July).
- Announcement reported widely in the press that 100% of north London's household recycled plastic is processed in the UK.

Volunteer and Education Manager, Ken Hayes from Get Loose
Winner of 2020 Waste Prevention Community Fund, Hackney City Farm
